Say Goodbye to Dropped Calls

**INCREASES POWER
TO THE CELL SITE
UP TO **20 TIMES**
OVER THE CELL
PHONE ALONE**

Wilson's iBooster for iPhone® and Blackberry® Curve

The Wilson plug and play iBooster and its external vehicular antenna increases a phone's output power to a cell site and improves the phone's ability to hear signals it normally can not, keeping the user connected in weak signal areas.

The iBooster helps users reduce dropped calls, increase data rates and originate calls from those dreaded "dead spots". The iBooster is designed for simple set up and can be easily moved from vehicle to vehicle.

At the heart of the iBooster is a Wilson bi-directional Smart Technology® signal amplifier and battery charging circuitry, all built into a convenient, phone specific 'slip in' cradle.

The cradle is ideal for hands free operation in conjunction with a headset or Bluetooth device.

The Wilson Electronics iBooster amplifier kit includes:

- **Signal Amplifier, charger and cradle, all in one**
- **Outside vehicular magnet-mount antenna**
- **Cigarette lighter power adapter**
- **Installation guide**
- **30-day, money-back guarantee and limited one-year product warranty**

Wilson, in business for 42 years, has consistently led the industry in performance standards and holds a number of patents including the industry's best and most reliable method of amplifier cell site interference protection. Wilson's designs consistently outperform the competition in real world performance.

All Wilson products are engineered, assembled and 100% tested at the company's headquarters in St. George, Utah. Our products fully comply with industry guidelines for cellular devices and are FCC and Industry Canada type accepted.

iBooster™ Wireless Amplifier Charger Combo

FEATURES

- Installs in seconds – no special tools required
- Amplifier features a built-in interior antenna and battery charger
- Increase phone's voice and data performance in weak signal areas
- Amplifies signals to and from cell site
- Can be used for "Hands Free" operation
- Microprocessor-controlled circuitry ensures reliable operation within regulatory standards
- Oscillation protection and shutdown auto reset

SPECIFICATIONS

Part Number	805201
Frequency	824-894 MHz / 1850-1990 MHz
Gain	40 dB / 40 dB
Max Output Power	1000 mw
Max RF (up/down)	+30dBm
Noise Figure	3.5 dB nominal
Flatness	±4dB
Isolation	> 90 dB
Power Requirements	12V*
Connectors	SMA Female
Dimensions	2 x 4.75 x 1 (inch) 5.1 x 12.1 x 2.5 (cm)
Weight	3 (oz) / 0.09 (kg)

KIT

Wilson's new iBooster™ improves both voice and data performance on the road. With 20 times the power to the cell site of a cell phone alone, it features a built-in antenna, battery charger and works with Cellular (800 MHz) and PCS (1900 MHz) frequencies.

The Wilson Electronics' iBooster amplifier kit includes:

- iBooster all in one cradle combo: amplifier/charger
- Outside vehicle magnet-mount antenna
- Cigarette lighter power adapter
- Installation guide
- 30-day, "No Questions Asked" money-back guarantee
- Limited one-year product warranty

*Use only with supplied cigarette lighter power supply
